

# Falun Solar Project Overview

OneEnergy Renewables and Northwestern WI Electric Company (NWE) are in the process of developing a 2.5 MW solar project in the Town of Wood River. The project is located southwest of the intersection of Wicklund and Range Line Rd (Please see site plan on reverse). OneEnergy Renewables will develop, design, and construct the solar project, and electricity from the project will serve local NWE customers.

The project will occupy approximately 12.5 acres, and has an expected useful life of 30-40 years, providing clean, local renewable energy for years to come. At the height of construction, roughly 30 people will be employed on this project. *Solar installer* is one of the fastest growing jobs in the USA.

### SYSTEM STATISTICS

- 2.5 Megawatts
- ~12.5 acres
- ~5,000,000 kWh per year

### MAIN SYSTEM COMPONENTS

- Single-axis tracker (tracks the sun from east to west throughout the day)
- Bifacial solar panels
- Inverters
- Transformers

## Sustainable Design and Construction

The area beneath and around the panels will be planted to a low-growing perennial pollinator mix. This increases water infiltration relative to conventional row-cropping. Water that flows off solar panels is safe for people and wildlife.

The project area will be fenced within an 8' tall deer-exclusion style fence, similar to what one might find around an orchard.

When the project is decommissioned, all infrastructure will be removed, and the site restored to pre-development conditions for continued agricultural use with rested and restored soils.
